- ESTAR non-condensing tankless - \$400
- ESTAR condensing tankless - \$500
- Condensing storage tank - \$1000

Contact an
Energy Advisor
(\$100 to EA, \$400
to builder)

Reach Steps 2, 3,
4 or 5

Additional Incentives

- EnerChoice fireplaces - \$300
- ENERGY STAR gas dryers - \$100

Rebates

Application Process – Stage 1

Mid-construction

- EA registers project
 - Collect contact and project information
 - Submits proposed building energy efficiency information
- Mid-construction blower door test highly encouraged, but not required
- \$100 to Energy Advisor

Application Process – Stage 2

End of Construction

- EA submits final project information
 - Upload As-Built BC Energy Compliance Report
 - Upload EnerGuide label
- Rebates paid to builder (remaining Energy Advisor Support, Step Code/water heat rebates)

How to Get Started

- **Visit** www.energystepcode.ca or your local building permit office to determine the Step Code requirements for your municipality
- **Visit** www.fortisbc.com/newhome to familiarize yourself with the Program or contact your Energy Solutions Manager
- **Work with** your energy advisor to develop a building specification that meets the required metrics of your targeted Step
- **Proceed** with FortisBC's New Home Rebate application

Homeowner Benefits

- **Lower energy bills:** lower energy consumption reduces operation costs
- **Comfort:** minimizes warm and cold spots
- **Quiet:** increased insulation levels and better windows can reduce outside noise
- **Durable:** focus on envelope first, minimum requirements beyond building code
- **Peace of mind:** third party verified by trained energy advisor

Thank you
